Technical Profile

- Git
- JIRA
- PostgreSQL
- Docker
- TypeScript
- JavaScript
- Java
- CSS
- Swift
- Flutter
- Firebase
- Objective-C
- Kotlin
- Ruby on Rails

An accomplished and versatile software engineer with a strong foundation in a wide range of programming languages and frameworks, including Swift, Java, Kotlin, JavaScript, Ruby on Rails, Flutter, and GraphQL. Demonstrated expertise in both modern application development and the maintenance and modernization of legacy codebases. Proficient in project management and agile methodologies, with a proven track record of leadership as a Scrum Master and experience managing cross-functional teams. Known for initiating Agile methodologies to address common project issues, fostering collaborative environments, and guiding teams to successful project completion. Possesses a strong commitment to delivering high-quality results while leading and motivating team members.

Work History

2023-06 -
Current

Senior iOS Engineer

AB Leisure Exponent Inc, Taguig

- Assigned the crucial responsibility of re-architecting a project and introducing Agile methodology to the team, addressing common issues such as workload visibility and meeting deadlines.
- Initiated the Agile methodology implementation, leading to significant improvements in project management, increased visibility of tasks, and improved adherence to deadlines.
- Currently serving as a dedicated Scrum Master, effectively managing a cross-functional team of 10-12 professionals, ensuring smooth project execution and team collaboration.
- Solely responsible for managing the iOS part of ArenaPlus, demonstrating self-reliance and technical proficiency.

Key Projects:

- **BingoPlus & ArenaPlus - Live Gaming Platforms** - Spearheaded the development of BingoPlus and ArenaPlus, innovative online platforms offering live streaming of bingo and casino games, along with a game betting feature. These platforms deliver an immersive and dynamic gaming experience, catering to players seeking real-time

- CI / CD

2022-10 -
2023-06

Senior Full Stack Engineer

BlueSky Digital Labs, Perth

- Engineered modern applications using a diverse set of technologies including Swift, Java, Kotlin, JavaScript, Ruby on Rails, Flutter, and GraphQL, showcasing a broad skill set and adaptability across multiple languages and frameworks.
- Demonstrated expertise in maintaining and modernizing legacy codebases, enhancing software quality, and improving system performance.
- Independently managed and led four projects, with two of them being solo endeavors, highlighting strong project management and problem-solving skills.

Key Projects:

- **Hungry Mart - Food Delivery App** - Led the development of Hungry Mart, a food delivery application, leveraging multiple technologies to create a seamless user experience and efficient food delivery service.
- **Blissiree - Mental Health App** - Pioneered the development of Blissiree, a mental health application, focusing on user-friendly design and providing valuable resources and support to users.
- **Hycon - Machine Check-Up Form Creation** - Successfully delivered the Hycon project, which involved creating a form system for machine check-ups, improving maintenance procedures and data collection efficiency.
- **HomeRun - Order Delivery Management App** - Led the development of HomeRun, an order delivery management application, streamlining order processing and enhancing the logistics management process.

2022-02 -
2022-03

Senior iOS Engineer / Flutter Engineer

Collabera PH, Makati

- Deployed to UnionDigital, contributing to the development of a banking app using Flutter,

showcasing adaptability and expertise in cross-platform mobile development.

- Joined the developer team at Mynt, actively contributing to the development of the GCash app, one of the leading e-wallets in the Philippines, leveraging Swift to deliver critical tasks and enhance user experience.
- Proficiently utilized Swift in delivering tasks and optimizing functionality within the GCash app.
- Successfully adapted to the Spotify model for Agile methodology, ensuring efficient project management and delivery.
- Introduced the Input/Output/Types approach of MVVM for iOS Development, demonstrating innovation and expertise in architectural design.

Key Projects:

- **Pitaka - E-Wallet App (UnionDigital)** - Contributed to the development of Pitaka, an e-wallet app supported by UnionDigital, emphasizing versatility in mobile app development.
- **GCash - Leading E-Wallet (Mynt, Backed by Globe)** - Played a pivotal role in the development of GCash, one of the Philippines' most prominent e-wallets, backed by Globe, a major telecom company. Leveraged Swift to enhance the app's functionality and user experience.

2020-05 -
2022-10

Senior iOS Developer / Technical Lead

CODY Web Development / LIG PH, Cebu City

- Acted as a technical lead within the mobile department, responsible for project management, personnel management, and codebase oversight, while concurrently serving as a senior iOS Engineer actively involved in project development.
- Managed all aspects of iOS project deployments, ensuring seamless and efficient releases.
- Provided comprehensive instruction to junior developers, facilitating their proficiency in the Swift programming language and fostering a collaborative learning environment for effective onboarding.

- Led a diverse team of 15-20 professionals, encompassing iOS, Android, and Flutter developers, ensuring cohesive and productive teamwork.
- Established code review meetings to identify and rectify weaknesses in contributed program content, preemptively mitigating potential user-facing bugs.
- Proposed an architecture standardization initiative for adoption across all Flutter projects, promoting consistency and scalability.
- Designed user experience frameworks capable of accommodating both iPad and iPhone screens, ensuring a seamless and responsive user interface.
- Achieved a promotion to the role of Technical Lead within one year of tenure.

Key Project:

- **Tocaro - Team Communication and Project Management App** - Spearheaded the development of Tocaro, a platform similar to Slack, enabling efficient team communication and project/task management, showcasing strong leadership and technical expertise.

2019-01 -
2020-05

Lead iOS / Software Engineer / Head IT

WeAreChurPhilippines, PH, Makati City

- Translated basic design plans into comprehensive iOS app frameworks, effectively delegating project components to the appropriate team members.
- Played a pivotal role in client meetings, providing in-depth explanations of technical topics and facilitating the translation of business logic into actionable development tasks.
- Demonstrated exceptional performance, resulting in a promotion to the position of Head IT within a few months of joining the team.
- Currently leading a small mobile development team, consisting of three highly skilled professionals, ensuring project success and efficient collaboration.

Key Projects:

- **Club CHUR - Wi-Fi Sharing Mobile App** - Led the development of Club CHUR, a mobile app enabling users to share their Wi-Fi networks, enhancing connectivity by allowing others to easily connect when the app detects available networks.
- **WiFi Pass PH - Philippine Wi-Fi Sharing Mobile App** - Spearheaded the creation of WiFi Pass PH, tailored for the Philippines, enabling users to share their Wi-Fi connections, promoting community connectivity and convenience.
- **CHURKit - Indoor Navigation Framework** - Introduced CHURKit, an indoor navigation framework provided for apps that require precise user tracking within enclosed premises, contributing to enhanced location-based services.
- **VenCHUR - Community Goods Information Mobile App** - Successfully developed VenCHUR, a mobile app designed for community members to share essential details about available goods sources, fostering local collaboration and access to essential resources.

2017-08 -
2019-01

Web and Mobile Development Engineer

Gorated Innovation Labs, Pasig

- Orchestrated the development of web applications utilizing Ruby on Rails, consistently delivering high-quality, scalable, and efficient solutions.
- Successfully managed and optimized servers hosted on both AWS and Azure, ensuring top-notch performance, security, and cost-efficiency.
- Developed comprehensive engineering designs and plans that adhered to industry best practices and standards, resulting in robust and reliable software products.
- Implemented Continuous Integration/Continuous Deployment (CI/CD) pipelines using Jenkins, streamlining web application deployment and minimizing downtime.
- Solely handled the execution of multiple projects,

demonstrating exceptional problem-solving abilities and efficient project management.

- Actively participated in client meetings, translating intricate technical details into understandable explanations, and aligning technical aspects with project objectives.
- Configured and maintained the SendGrid mail server to facilitate efficient email communication.
- Proficiently developed iOS applications using Swift and Objective-C, further diversifying skillset and contributing to app development projects.

Key Projects:

- **McDo PH - McDelivery Mobile App (Philippines)** - Spearheaded the development of the McDelivery mobile app, enhancing user experience and revolutionizing food delivery services.
- **DentaSKED - Dental Appointment Booking App** - Led the creation of a user-friendly mobile app for booking dental appointments, streamlining the scheduling process for both dentists and patients.
- **Tripkada - Traveler's Trip-Pooling Mobile App** - Pioneered the development of Tripkada, a mobile app enabling travelers to join trips organized by fellow travelers, akin to an Uber-like pooling system for trips.
- **Facebook Live Game - Live Game Show on Facebook** - Played a pivotal role in developing and launching an engaging live game show aired on Facebook, captivating a wide audience and ensuring a seamless user experience.
- **Uniqlo - Online Promo Platform** - Designed and executed the Uniqlo online promo platform, allowing users to upload photos of their outfits, with management choosing winners, boosting user engagement and brand loyalty.
- **Messenger Chatbot for Small Businesses** - Developed a versatile Messenger chatbot tailored to small businesses, automating customer interactions and enhancing operational efficiency.

2017-07

Gorated Innovation Labs, Pasig City

Key Projects:

- **APEC MSME Marketplace - Online Marketplace -**
Led the development of the APEC MSME Marketplace, an innovative online platform facilitating trade between micro, small, and medium-sized enterprises (MSMEs) across the Asia-Pacific region.
- **Tripkada - Traveler's Trip-Pooling Mobile App -**
Pioneered the development of Tripkada, a mobile app enabling travelers to join trips organized by fellow travelers, akin to an Uber-like pooling system for trips. Contributed significantly to its success by architecting and implementing the backend infrastructure.

2014-06 -
2017-04

Web Developer

Freelance, Cainta, Rizal

- Successfully completed a series of small-scale projects utilizing PHP and the Laravel framework, delivering tailored web applications that met the specific needs of clients.
- Developed and deployed lightweight C# desktop applications for small businesses, enhancing their operational efficiency and improving customer interactions.
- Demonstrated meticulous attention to detail and a commitment to delivering high-quality results, even on smaller projects.
- Effectively communicated with clients to gather project requirements, provide regular progress updates, and offer ongoing technical support, cultivating positive and lasting client relationships.
- Managed multiple concurrent projects, showcasing strong time management and multitasking skills while consistently delivering within budget and on time.
- Actively sought and incorporated client feedback, continuously refining project outcomes and ensuring client satisfaction.
- Leveraged small-scale freelance projects as opportunities for practical learning, gaining valuable hands-on experience in software development during early college years.
